IN2IT

Reducing the cost of Data Assurance

What would be the cost to your business if you lost your critical data?

Your business data is the lifeblood of your company and the amount you are collecting and storing is growing all the time. Imagine the impact if you lost a days data, a weeks data, a years data, due to inadequate or infrequent back-up processes. What would happen, could you recover?

A managed backup service from IN 2 IT ensures that all files are automatically backed up as frequently as every 15 minutes if needed. And it will likely cost less than your monthly phone bill. So, how much is **your** data worth?

Key Features

Block level Infinite Incremental backup
I2 technology™ means never having to do another full backup drastically reducing the backup time, storage space, network traffic, and the workload of your servers.

Recover your data to dissimilar hardware
Can perform a bare metal restore of your data to dissimilar hardware. You don't have to worry about purchasing that new server anymore!

Virtual server support
Backup your virtual servers with the same software that you use to backup your physical servers.

Supreme flexibility
Recover your data from nearly any point in time. Whether it is just one file or a full restore.

Full Transparency Through Reporting
Wide range of detailed reports are provided monthly to ensure that you know what is happening and that you can breathe easy knowing that your data is protected.

Fully Monitored System
We monitor the software to ensure it is always working, and will act immediately if there is an issue

Threats facing SMBs today

- Loss of Data
- Failed Restores
- Costly Upkeep
- Unreliable Systems
- Compliance
- Cost of downtime

"75% of small and midsize businesses rank data loss as the most significant risk to their business."

Applied Research

Benefits of Managed Backup

- **Low cost of ownership**
  A fully managed data backup and restore solution for the same or less than a capital purchase that you have to manage yourself.

- **Total Peace of Mind**
  Thanks to centralized management & monitoring by our NOC team, you can rest assured that your business data is safe and being handled by expert's means you can focus on your business

- **Reduce your day to day operating costs**
  While most solutions require full backups periodically or in some cases daily, our solution only requires an initial full backup then from that point stores only incremental file changes. Saving you money in storage space, data transfer costs and server load.

- **Safeguard business information**
  Since the solution takes backups in terms of changes, you will be able to recover files, even older revisions.

- **Ensure Business Continuity**
  Backup up your most critical business applications to ensure that you can get quick access to restore systems that would have the most impact to your day-to-day operations if they were down.

- **Increase productivity and decrease downtime**
  With our rapid restore capabilities, we will minimize the costs associated to lost productivity and downtime.

- **Detailed reporting Information**
  No longer will you be unsure of how well your data is protected. We will provide you with reports monthly that let you know that your data is safe!

Why our clients choose our Managed Backup Solution

Device Lifecycle Management

Reduced Costs
- Less storage space required
- Less bandwidth needed
- Recover to dissimilar hardware if needed

Improved productivity
- Back up more data in less time
- Minimize downtime with faster restore times
- Restore a single file or a complete volume from any point in time you have data backed up

Increased awareness
- Centralized NOC Management & Monitoring by our engineering team
- Detailed monthly reports on backup status

Increased confidence
- Regular backups minimize business downtime in the event of a data loss
- Backups are always scheduled and managed by experts

"47% of business owners directly link lost revenue to data loss and acknowledge they have inadequate data backup procedures"

Applied Research

Features		Remote Backup Manager
Initial Data Assessment & Plan	Included	*Our engineers will assess your critical data and develop a comprehensive backup plan that protects your critical data.*
Disk Based Backup Deployment & Configuration	Included	*Installation of our enterprise class disk based backup & recovery software*
Monthly Backup Capacity & Performance Reporting	Included	*Regular reporting demonstrating the effectiveness of the backup solution and ensuring efficient use of resources.*
Monitored & Managed by our Network Operations Center	Included	*Our team of NOC engineers work in the background to ensure backups are successful and critical data is protected.*
Remote Backup to Cloud	Option	*Important files & folders are stored in the cloud in case of critical failure.*
Data Center Replication & Disaster Recovery Planning	Option	*Advanced Disaster Recovery options are available to eliminate the risk of data loss and protect your business.*
Essential Support ☐ Attended & Unattended remote control for additional support ☐ Asset Discovery and Reporting ☐ Device Health Monitoring	Value Added Service	*Our NOC team is available to assist with all your support needs, delivering support remotely and actively monitoring your systems for critical failure*

Don't risk your business by being unprepared!
